

## DEALING WITH A POSITIVE OR SUSPECTED COVID CASE

Information for netball associations who have had a confirmed or suspected COVID case participate in competition, training or NetSetGO.

### AT HOME

#### ANYONE THAT TESTS POSITIVE MUST

- Isolate at home for 10 days from the date of their first positive test.
- Inform their family and friends immediately.
- Other household contacts must quarantine at home until they have received a negative result from a COVID test administered at a COVID testing site.
- The quarantine period will depend on their vaccination status.

### AT WORK AND SCHOOL

#### ANYONE THAT TESTS POSITIVE MUST:

- Inform their school and/or workplace.
- The workplace or school must then identify and inform other staff or students, who will be workplace contacts.
- Work colleagues or school friends should be tested for COVID at a testing site within 24 hours of being notified they were in contact with a positive case.
- If their test is negative, there is no need to quarantine, but they should keep monitoring for symptoms and get tested again if required.
- It's recommended they use a Rapid Antigen Test over the next seven days if required.
- They will need to show a negative COVID test before they can return to work or school
- If they test positive, they will need to follow the [Checklist for Positive Cases](#).

### AT NETBALL

#### ANYONE THAT TESTS POSITIVE MUST

- Notify their team, club and association about their positive result.
- Once informed a positive case has attended netball, the club or association will need to identify and notify the opposition team and umpires who were exposed and advise them to get tested. They will be known as social contacts. The opposition coach and umpires are will not be deemed contacts.
- Any social contact should get a standard COVID test as soon as possible and isolate until they get a negative result.
- If their test is negative, there is no need to quarantine, but they should keep monitoring for symptoms and get tested again if required.
- If they test positive, they will need to follow the [Checklist for Positive Cases](#).

### CONTACT TRACING

The Department of Health will no longer trace or manage close or social contacts.

It is important the positive case notifies anyone they have been in contact with.

It is important the netball club or association identifies and notifies those that need to be informed.

### CHECKLIST FOR POSITIVE CASES

If you have tested positive to COVID you can find out what to do [here](#).

### CHECKLIST FOR CONTACTS

If you have tested positive to COVID you can find out what to do [here](#).
