

Competition administrators can plug a device, (phone or tablet) into your current buzzer system. The app will automatically run the buzzer for all games throughout the day.

For games to appear under the Buzzer you will need to be added as a Manager to a team in each timeslot. We recommend created a Manager called 'Competition Buzzer' or similar and then add the Competition Buzzer as manager to all teams.

Open the Netball Connect app. Click More, scroll down and select Buzzer. The screen shows just one game for each timeslot. It won't allow you to score or do anything else just play the buzzer sounds. Be sure this device is dedicated to the buzzer and left untouched for the whole day.
