

Select the Match Day module

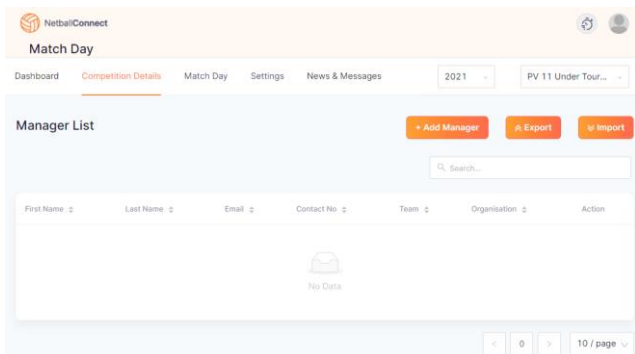

Select the relevant competition on the dashboard.

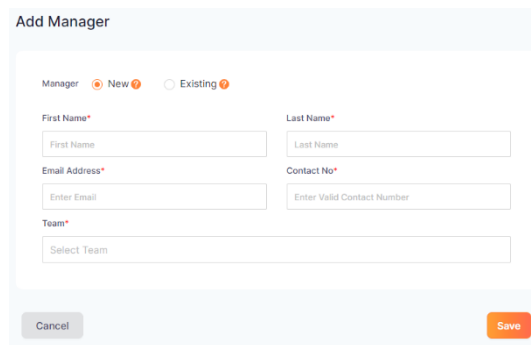

Select Competition Details > Managers.

Select **+ Add Manager**. A team can have as many managers as you need to add.

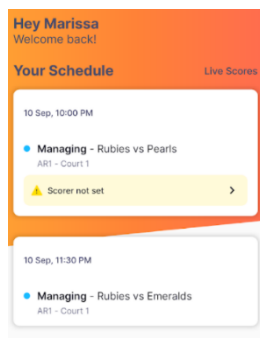

If the manager has a Netball Connect profile associated to your club, you can add them as an 'Existing' User. If the Manager doesn't have a Netball Connect profile with your club, check with the manager to see whether they have a Netball Connect profile at all. If they do, add them as a 'New' Manager with the same email & phone number as their existing profile, as to avoid creating a 'duplicate' profile. If they don't yet have a Netball Connect profile, you can create one for them here.

Managers will receive an email inviting them to download the Netball Conenct app. Managers should use the exact email address to login to the app. If they forget their password, they can do the Forgot/Reset Password.

Once logged in Managers will see a 'Managing' card for their team or teams.

Managers can review the document ['Netball Connect App for Scorers, Coaches and Managers'](#) for further details about how you can manage your teams in the app.
